Extending AMD's Efficiency Leadership on Desktop

Lower Power

Thermal Design power (TDP)

- Lowered the Thermal Design Power (TDP) of all models below Ryzen 9 9950X
- All models deliver increased performance

Higher Performance

Blender 3D Render, nT Performance

*all results are 'up to'. See endnote GNR-10

Overclocking Enhancements

Memory

- New AGESA supporting up to DDR5-8000
- New Memory Overclocking on-the-fly, and Memory Optimized Performance Profile features
- Memory OC enabled on all AM5 consumer chipsets
- JEDEC support for DDR5-5600

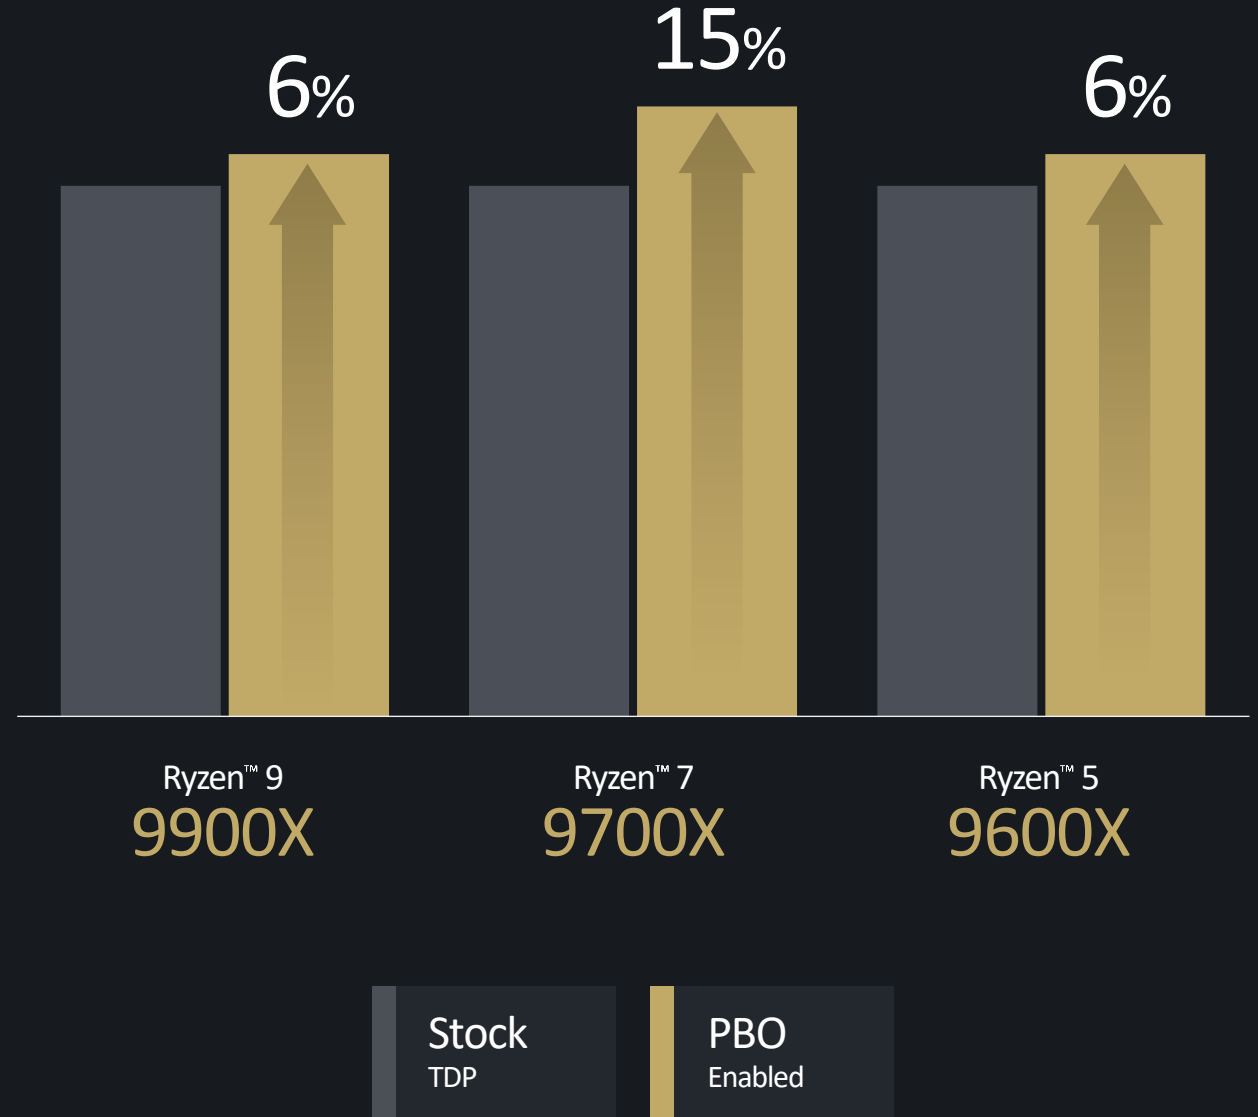

Processor

- New 'Curve Shaper' overclocking feature

Precision Boost Overdrive One-Click Overclocking

If a user desires to prioritize performance over efficiency, especially for multi-threaded workloads, the lower default TDPs means even more extra performance headroom with PBO enabled

*all results are 'up to'. See endnote GNR-12

Unmatched Socket Longevity

Incredible AM5 Platform Commitment

Socket AM4

145 CPU and APU models to-date

Nearly 9 years of new products

AMD 3D V-Cache™
Technology

Socket AM5

38 CPU and APU models and growing

Extending longevity through 2027+

AMD 3D V-Cache™
Technology

The AMD 800 Series Chipset Family

Simplifying the value proposition for users

	PCIe®	USB	Overclocking	Graphics	Competition
AMD X870E Chipset	Gen 5 Graphics and NVMe	USB 4 <i>Mandatory</i>	CPU and Memory	1x16, 2x8	Z790
AMD X870 Chipset	Gen 5 Graphics and NVMe	USB 4 <i>Mandatory</i>	CPU and Memory	1x16, 2x8	X670
AMD B850 Chipset	Gen 5 NVMe (Gfx optional) Gen 4 Graphics	USB 3.2 <i>20 Gbps</i>	CPU and Memory	1x16, 2x8	B760
AMD B840 Chipset	Gen 3	USB 3.2 <i>10 Gbps</i>	Memory only	1x16	B760

AMD Ryzen™ AM5 platform for serious AI performance

The Ultimate Enthusiast AI Platform

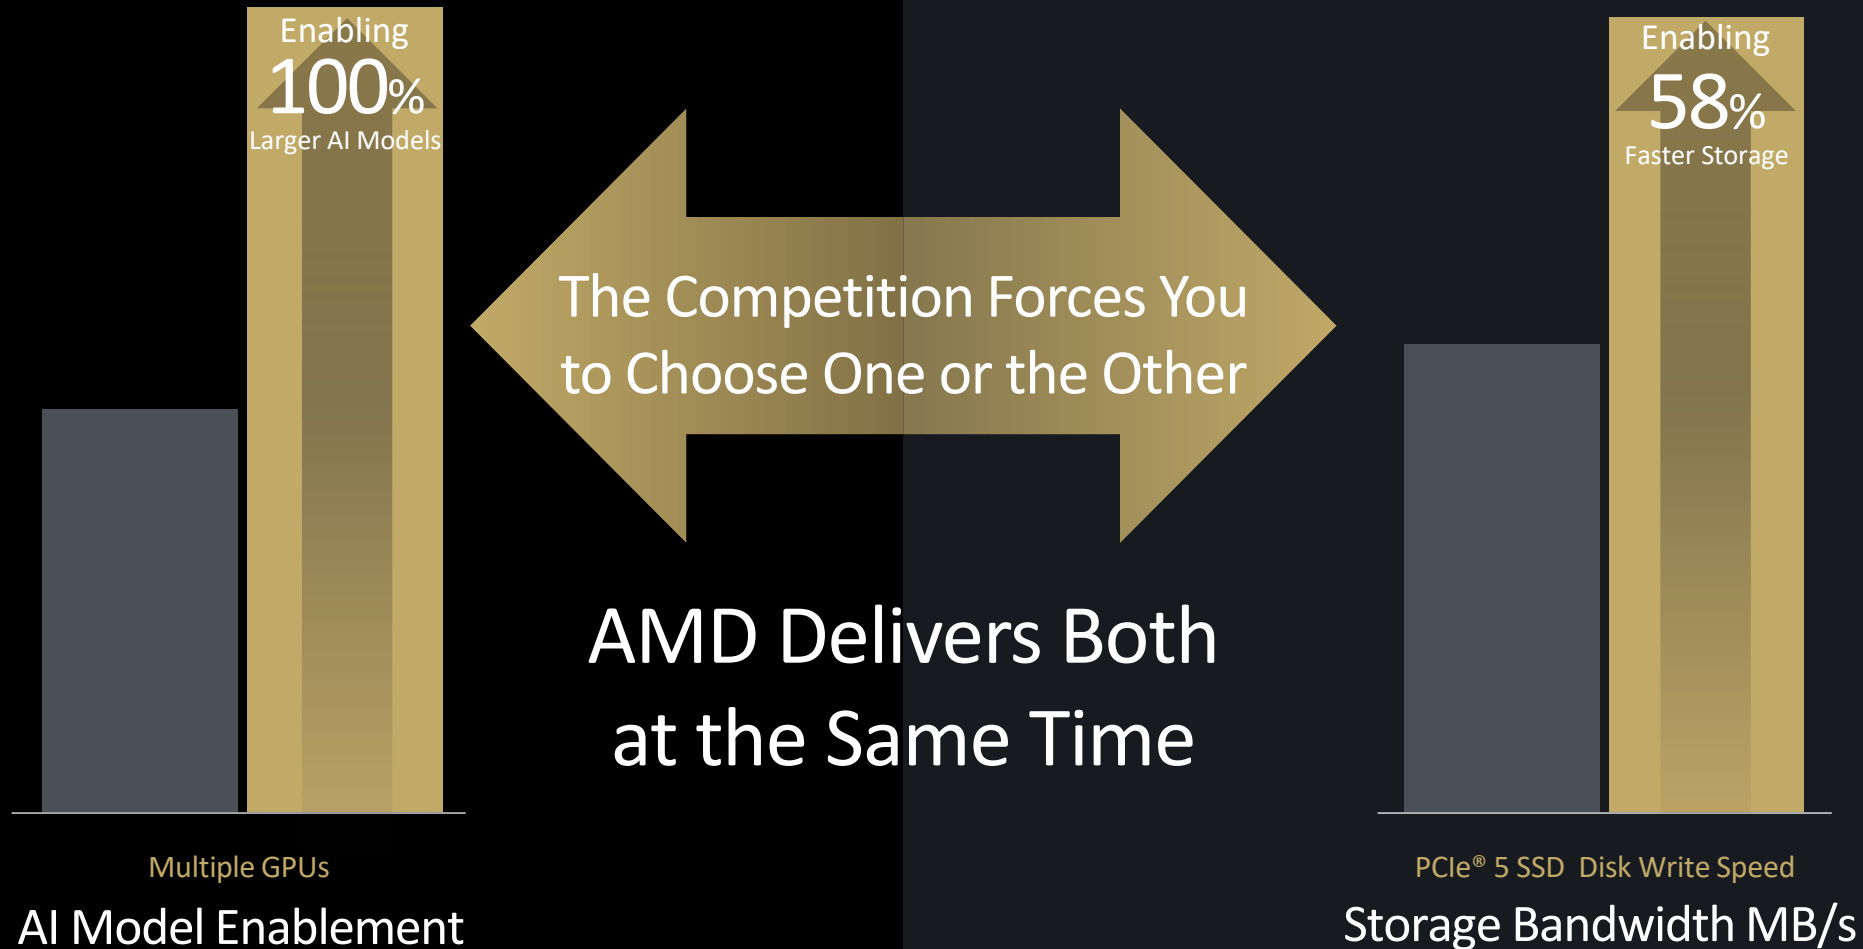

CONTENT CREATION – DEVELOPMENT - PRODUCTIVITY

Enthusiast AI Graphics

No Compromise with AMD Socket AM5

Intel™ Core® i9
